PROFESSIONAL SUMMARY

Report Analyst with 2.5+ years of experience delivering BI solutions and actionable insights using IBM COGNOS Analytics. Skilled in SQL(join, aggregations, window functions), data modelling and Excel/Power Query for ETL and analysis. Experienced collaborating with stakeholders to define metrics, investigate performance anomalies and present insights via dashboard and concise narratives. Seeking to drive data-informed decisions in a fast-paced environment.

CORE SKILLS

- SQL : Oracle SQL, Joins(INNER/LEFT), aggregations, CTES, window functions(ROW_NUMBER, RANK), subqueries, data cleaning.
- BI & Visualisation : IBM COGNOS Analytics(v11 & v12), Microsoft Power BI(DAX, Power Query).
- Data Modelling & Warehousing : Star/Snowflake schema design, COGNOS Framework Manager, ETL Fundamentals.
- Excel/Sheets : PivotTables, XLOOKUP/VLOOKUP, Power Query, Charts.
- Python : Pandas, NumPy for analysis and automation Scripts.
- Analytics : KPI definition, cohort/time-series analysis, variance analysis, root cause analysis anomaly investigation.
- Collaboration : Stakeholder management, Agile(Scrum/Kanban), JIRA, version control(GitHub)

PROFESSIONAL EXPERIENCE

SOCIETE GENERALE – Report Analyst July 2023 – Present | Bengaluru, IN

- Delivered end-to-end BI Projects across the SDLC, ensuring alignment with business objectives and on-time delivery in Agile sprints(Scrum/Kanban)
- Built and maintained reports in IBM COGNOS Analytics to track KPI's
- Wrote robust SQL queries in Oracle(Joins, CTE's, window functions) to extract, validate and analyse data for reporting and ad-hoc requests.
- Designed efficient analytical data models using COGNOS Framework Manager, enabling faster queries and self-service reporting.
- Used GitHub for version control and JIRA for user Stories, board management and issue tracking

PERSONAL PROJECTS

Plant Co. Performance Dashboard (Power BI)

- Analysed YTD vs OYTD performance across sales, gross profits and quantity. Build star-schema model, created DAX time-intelligence(YTD/PYTD) and KPI cards, ETLs via Power Query, visuals for geo and category breakdown.

SuperStore Sales Dashboard(Power BI)

- Modelled sales data, cleaned/reshaped via Power Query, KPI's for totalSales, Profit, Quantity, Avg Delivery Days, Trends by region/category and customer segments, included 15-day forecasting.

Coffee Sales Analysis (Power BI)

- Built star-schema and ETL with Power Query, DAX measures for Total Revenue, Avg Transaction value, transactions, payment split, interactive slices and top-product insights.
