Result-driven and highly organized professional with 2.5+ years of experience in the Business Intelligence industry, proficient in tools such as IBM Cognos Analytics and Microsoft PowerBI, recognized for delivering impactful insights and contributing to key objectives. Eager to take on new challenges and responsibility to support team success and organized growth.

EDUCATION

Bachelors of Computer Science Engineering | 2019 – 2023

S.D.M Institute of Technology

CGPA : 8.2

PRE-UNIVERSITY | 2017 – 2019

K.L.S PU Science College

Percentage : 82%

S.S.L.C | 2016 – 2017

V.V.D School Of Excellence

CGPA : 8.4

PROFESSIONAL EXPERIENCE

Societe Generale

July 2023 – Present

- Experienced in managing end-to-end BI projects covering the entire software development life cycle, including planning analysis, design, development, testing, deployment and maintenance of business intelligence solutions while collaborating directly with Product Owner to ensure alignment with business requirements.
- Over 2.5 years of experience in IBM Cognos analytics(v11&v12), specializing in report development, server and user administration, performance tuning, troubleshooting and validation business-critical data for accuracy and consistency.
- Proficient in designing and developing data models for analytical purpose using COGNOS Framework Manager (FM) ensuring efficient reporting structures.
- Practical experience working under Agile frameworks including both Sprint based SCRUM methodology and continuous flow KANBAN boards. Manage and administer all the projects related tasks using JIRA including creating user stories, maintain boards and tracking issue.
- Experienced in utilizing GITHUB to manage code repositories, perform version control, collaborate with team members and track project changes efficiently.

TECHNICAL SKILLS

- IBM Cognos Analytics, Microsoft Power BI
- Python, SQL
- Agile, SCRUM
- Data Warehouse Concepts
- ETL
- Data Cleaning
- Data Modelling

INTERPERSONAL SKILLS

- Problem Solving
- Teamwork
- Time Management
- Effective Communication

PERSONAL PROJECTS

Plant Co. Performance Dashboard

- Designed and developed an interactive Power BI dashboard to analyze YTD vs PYTD performance across sales, Gross Profit and Quantity.
- Implemented ETL workflows using Power Query for data extraction, transformation and loading, build a star schema data model with Fact and Dimensional tables
- Created the DAX measures for time intelligence (YTD, PYTD), dynamic KPI cards and slicers for metric selection.
- Developed visuals including Treemap, Waterfall, Clustered Column + Line, Scatter Plot and Geo Map for country-level insights.

SuperStore Sales Dashboard

- Build an interactive PowerBI dashboard on SuperStore dataset to analyze sales, profit, shipping efficiency and customer behavior.
- Designed star schema data model with separate dimensions for customer, product and order linked to sales fact table.
- Build an interactive PowerBI dashboard on SuperStore dataset to analyze sales, profit, shipping efficiency and customer behavior.
- Implemented ETL using Power Query for data cleaning and transformation, created KPI's for Total Sales, Profit, Quantity and Avg Delivery Days.
- Developed visuals for YoY sales trends, regional performance, category breakdown, payment mode and customer segment analysis.
- Integrated forecasting for 15-days sales prediction using PowerBI analytics.

Coffee Sales Analysis Dashboard

- Developed an interactive PowerBI dashboard to analyze coffee shop sales data, providing insights into revenue trends, top-selling products and payments method distribution.
- Implemented ETL using Power Query for data extraction, Transformation and loading, designed a star schema data model.
- Created dynamic DAX measures for KPI's(Total Revenue, Avg Transaction Value, Total Transaction, Payments Split) and dynamic subtitle for top-performing coffee products.
- Build visuals including Bar chart(Revenue by Coffee Type), Line chart(Monthly Revenue Trend), Donut chart(Payment Method Split) and interactive slicers for date and coffee type.

Spotify Track Analytics Dashboard

- Build an interactive PowerBI dashboard using Spotify dataset from Kaggle to analyze music trends and artists performance.
- Implemented ETL using Power Query, normalized datasets into snowflake schema for optimized relationships.
- Designed a structures data model with Fact table and multiple dimensional tables
- Created DAX measures for KPI's and dynamic visuals
- Developed visuals including Pie chart, Bar chart, Line chart and interactive slicer for album type and explicit flag.

CERTIFICATES

- [SQL for Data Analysis : Advance SQL Querying Techniques](#)
- [PowerBI Workshop](#)
